Call for Papers

Latin American Journal of Computing (LAJC) is an open access peer-reviewed journal. This journal publishes new results in different areas.

The goal of this journal is to bring together researchers and practitioners from academia and industry to present original research papers, technical reviews and state-of-the-art reviews for publication.

LAJC has a semi-annual periodicity. Authors are cordially invited to contribute to the journal by submitting their manuscripts for the first issue to be published by June, or the second issue to be published by December.

Submission Guidelines

Prospective authors are invited to submit original research papers and state-of-the-art reviews for publication in the Latin-American Journal of Computing LAJC. Papers are reviewed on the basis that they do not contain plagiarized material and have not been submitted to any other journal at the same time. All submitted research papers will be carefully evaluated based on their originality, relevance, and technical soundness.

They will be reviewed on a double-blind basis, which means that the paper should be written in such a way that it does not surely reveal an author's identity. The author(s) must remove:
a. Explicit indications of the authors names and institutions.
b. Acknowledgments and biography.

Author names, institutions, acknowledgments and biography will be returned to the printed manuscript upon acceptance for publication.

List of Topics

- **Information security**
- **Information systems**
- **Intelligent systems**
- **Software engineering**
- **Science, Technology and Society (STS)**
- **Computer Science and Information Technology for inclusive education and disability**
